CAREER OBJECTIVE

Driven to apply my technical and analytical skills, I aim to contribute to challenging projects that refine my abilities. Committed to fostering innovation and excellence, I am eager to play a key role in driving organizational success

EXPERIENCE

Cognizant Technology Solutions, India • Programmer Analyst

(01/2021 – 06/2022)

- Proficient in developing web services using HTTP REST/JSON and SOAP, ensuring robust data exchange and integration capabilities.
- Maintained and enhanced front-end interfaces using Angular JS, Angular 2, HTML5, and CSS3; developed proficiency in React, JavaScript, Node JS, and backend development with Spring and Spring Boot, while managing and maintaining source bases to develop technical solutions for complex business problems.
- Utilized CI/CD for consistent and automated build, packaging, and application testing to maintain code quality.
- Played a key role in building and managing aPaaS infrastructure for Java/ReactJS applications, which supported scalable and efficient application deployment.

PROJECTS

Auditing for Bias – May 2023

Analyzed racial bias in a machine learning model using the ProPublica COMPAS dataset, focusing on disparities in false positive rates between African-American and Caucasian defendants. The study emphasized the need for fairness in algorithmic decision-making, revealing a higher false prediction rate of recidivism for African-American individuals, highlighting societal impacts and the necessity for ethical algorithm development.

Food Munch (Web Application) – August 2023

Designed a user-friendly web application for a restaurant, enhancing user interaction and order efficiency. Key features included intuitive menu navigation, a dynamic cart, and a custom spice-level option. I also implemented a real-time kitchen interface for order management, significantly improving customer experience and operational efficiency.

Campus360 - Full-Stack Application Development

Developed a full-stack application for managing student surveys on campus visits, featuring integrated front-end and back-end systems. This enhanced user experience for survey completion and provided administrators with tools for data access and analysis, significantly improving transparency and enabling a data-driven approach in campus visit management.

EDUCATION AND ACHIEVEMENTS

George Mason University, Virginia

August 2022 – May 2024

- *Masters in Computer Science*

3.6 GPA

Aditya Institute of Technology and Management

June 2016 – Sept 2020

- *Bachelor of Technology in Computer Science & Engineering*

3.3 GPA

- ***AZ – 900: Microsoft Azure Fundamentals***
- ***Rising Star Award, Cognizant Technology Solutions***
- ***Published a Journal in International Journal of Computer Applications (IJCA) 176.13 (2020).2020***

SKILLS

Java Programming, C Programming, C++, Python, SQL, JCL, COBOL, DB2, Mainframe, HTML, CSS, JavaScript, React, Node JS, Bootstrap, Angular, Machine Learning, Microsoft Azure, Jenkins, RESTful API, Git
