## PROFESSIONAL SUMMARY

---

Dedicated Java Developer with extensive experience in Core Java, Spring framework, and RESTful API Services. Proven expertise in leveraging AWS Cloud services, Unix shell, and Python scripting to develop scalable data solutions. Adept at collaborating with cross disciplinary teams and enhancing operational efficiency through CI/CD pipelines and Big Data technologies. Seeking to apply my skills in Java development and cloud solutions to drive impactful projects.

## SKILLS

---

|                                    |                                                                                                                                                                                          |
|------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Programming Languages</b>       | : Java, C, C++, Python, SQL, HTML, CSS, JavaScript, SQL, Node.js                                                                                                                         |
| <b>Python Libraries</b>            | : pandas, scikit-learn, matplotlib, seaborn                                                                                                                                              |
| <b>Machine Learning Algorithms</b> | : Decision Trees, Random Forest, Logistic Regression                                                                                                                                     |
| <b>Frameworks</b>                  | : Spring Framework, Angular JS, React, Microservices                                                                                                                                     |
| <b>Cloud Platforms</b>             | : AWS Fundamentals, Microsoft Azure                                                                                                                                                      |
| <b>Software and Tools</b>          | : Junit Testing (Jupiter, Selenium), AWS Cloud Services (EC2, Athena, Cloud Formation), UNIX Shell Scripting, CI/CD Pipeline, OpenCV Libraries, Jenkins, Git, JIRA, Service Now, Zendesk |
| <b>Operating Systems</b>           | : Windows, Linux                                                                                                                                                                         |

## EXPERIENCE

---

### George Mason University United States • Research Assistant

May 2023 – May 2024

- Developed and tested a survey to conduct an experiment over 50 students for a project proposal to submit for NASA using Lime Survey and JavaScript, including custom features like automatic console log downloads.
- Implemented machine learning algorithms such as Convolutional Neural Networks (CNNs) and OpenCV libraries to achieve 75% accuracy for sophisticated gaze detection, strictly following Software Development Life Cycle (SDLC) standards to guarantee the creation of a resilient and high-performance tool.

### Cognizant Technology Solutions, India • Java Developer

January 2020 – June 2022

- Proficient in developing web services using HTTP REST/JSON and SOAP, ensuring robust data exchange and integration capabilities. Experienced in RESTful API Services and implementing AWS Cloud solutions like Lambda and S3.
- Maintained and enhanced front-end interfaces using AngularJS, Angular 2, HTML5, and CSS3; developed proficiency in React, JavaScript, Node.js, and backend development with Spring, Spring Boot, and Spring Batch, while managing and maintaining source bases with GIT/Bitbucket to develop technical solutions for complex business problems.
- Enhanced code quality and operational efficiency by implementing a robust CI/CD pipeline, reducing build and deployment times by 30%.
- Collaborated with cross-disciplinary teams to conceive, design, and bring innovative products and services to market.
- Built and maintained distributed storage, index, and query systems that are scalable, fault-tolerant, low-cost, and easy to manage, utilizing AWS services like EC2, Athena, SQS, and Cloud Formation.
- Unix shell and Python scripts to automate tasks, promoting reusable components and enhancing operational efficiency. Leveraged relational databases and SQL along with Big Data technologies like Cloudera and Spark to develop scalable, efficient data solutions, improving data processing performance by 25%.

### Cognizant Technology Solutions, India • Programmer Analyst Intern

January 2019 – January 2020

- Collaborated with UX/UI designers to integrate visual designs, optimizing for user experience and accessibility.
- Participated in code reviews, debugging, and troubleshooting to ensure high-quality code and smooth functionality.
- Developed and executed JUnit test cases to ensure robust functionality and maintain code quality.
- Worked closely with back-end developers to integrate APIs and ensure seamless data flow between front-end and back-end systems.

## PROJECTS

---

### Auditing for Bias – May 2023

**Project Description:** Assessed potential racial bias in a machine learning model using the ProPublica COMPAS dataset, aimed to understand disparities in false positive rates and calibration for African-American and Caucasian defendants, and explored the implications of algorithmic decision-making in criminal justice.

- Assessed potential racial bias in a machine learning model using the ProPublica COMPAS dataset, aimed to understand disparities in false positive rates and calibration for African-American and Caucasian defendants, and explored the implications of algorithmic decision-making in criminal justice.
- Findings indicated that the algorithm was more likely to falsely predict recidivism for African-American individuals, highlighting significant societal implications and the need for fairness in algorithmic decision-making.
- **Programming Languages Used :** Python
- **Algorithms & Techniques Used :** Linear Regression, Decision Trees, AdaBoost, ROC Curve Analysis

### Food Munch (Web Application) – May 2023

**Project Description:** Designed and developed an interactive web application for a restaurant, focusing on user engagement and streamlined ordering. Introduced an intuitive menu navigation, a dynamic virtual cart, and a customizable spice level feature using visual icons. Implemented a real-time kitchen-side interface for efficient order tracking and management.

- Pioneered the creation of a user-centric web application, fostering seamless menu browsing, dynamic sorting options, and real-time cart modification, reinforced by a local storage-based review system, culminating in a streamlined ordering process for heightened user satisfaction.
- **Software Technologies Used :** HTML, CSS, JavaScript, Bootstrap, Angular

### Campus360 - Full-Stack Application Development – August 2023

**Project Description:** Created a comprehensive full-stack application geared towards the administration of student surveys linked to campus visits. This multifaceted application consists of front-end and backend components meticulously designed to optimize user experience. Prospective students will be able to seamlessly complete survey forms, sharing their valuable feedback regarding their campus visit encounters. Meanwhile, users will have the ability to access and review a repository of all previously recorded surveys, ensuring a transparent and data-driven approach to campus visit management.

- **Front-end Technologies Used :** HTML, CSS, Angular, Java Script
- **Back-end Technologies Used :** Spring Boot, RESTful API Services, JDBC
- **Database Tools Used :** My SQL Workbench

## EDUCATION AND ACHIEVEMENTS

---

### George Mason University, Virginia ([Link](#))

- Masters in Computer Science

August 2022 – May 2024

3.6 GPA

### Aditya Institute of Technology and Management

- Bachelor of Technology in Computer Science & Engineering

June 2016 – Sept 2020

3.3 GPA

- **AZ – 900: Microsoft Azure Fundamentals ([Certification Link](#))**

- **Microsoft Certified: Azure AI Engineer Associate ([Certification Link](#))**

- **Rising Star Award, Cognizant Technology Solutions ([Link](#))**

- **Published a Journal in International Journal of Computer Applications (IJCA) 176.13 (2020).2020 ([Link](#))**
